

## Riedell Speed Boot Fitting Guidelines

Finding a pair of boots that fit properly can be very challenging – no two feet are exactly alike and every boot model has a distinct design that can affect how it feels. To add to the confusion, most skate boot manufacturers, including us, have unique sizing that differ from street shoe sizing. For our boots, the proper size for you will depend greatly on which last the boot is built on – which is why we want to share the information below with you. Please note that this information is to be used as a reference only. We strongly recommend trying boots on before you purchase.
